

# SUPA SHINE

## Premium Maintenance Feed For Your Horse

**Supa Shine - The name explains it all!**  
If you have a horse that is in need of some condition or lacking some shine, this is the feed you are looking for. A great maintenance feed with a low grain content, Supa Shine is a versatile feed suitable for a wide calibre of horses. It is another one of our signature high quality feeds containing a full range of major minerals, trace mineral and vitamins. This means that the need for other supplements is minimised.

### Feeding Recommendations:

As a recommendation, feed 1-2kg of Supa Shine per day to a mature 500kg adult. If body condition is poor this may be raised to 3-4kg per day until condition is regained. If the horse carries excessive condition reduce the meal intake to 0.5-1kg per day. When offering higher amounts, split the daily meal into morning and evening feeds to avoid acidosis and improve the efficiency of meal utilization. Mixing the meal with chaff will reduce the rate of the meal intake and help minimize digestive upsets.

Supa Shine is a supplementary feed for horses. This meal should be fed along with ad-lib pasture and quality hay. The actual level fed is dependent on the condition horse and the quality of the pasture.

## SIMPLY THE BEST

### TYPICAL ANALYSIS:

Horse DE	3.569mcal/kg
Horse DE	14.909 MJ/kg
