

SUPA SPORT

Premium Feed For Your Working Horse

On the hunt, on the track,
in the arena, in the ring? Supa Sport
is a balanced formulation that meets
the energy and protein needs for
peak performance from any calibre
of sport or working horse.
Highly palatable and digestible and
containing a full range of vitamins
and minerals, the need for other
supplementation is minimised, taking
the hard workout of fuelling your
working horse.

Feeding Recommendations:

As a guideline, feed 3-6kg of Supa Sport per day to a
mature horse of around 500kg. Typically, eventing
horses in good condition will require 3-4kg per day and
racehorses 5-6kg per day during periods of intense
competition or racing. When offering higher amounts,
split the daily meal allocation into at least 2 and
preferably 3 feeds throughout the day to avoid acidosis
and improve the efficiency of meal utilization. Mixing
the meal with chaff will reduce the rate of meal intake
and help minimize digestive upsets.

SIMPLY THE BEST

TYPICAL ANALYSIS:

Horse DE	3.580mcal/kg

Supa Sport is a supplementary feed for horses. This meal
should be fed along with ad-lib pasture and quality hay.
The actual level fed is dependent on the condition horse
and the quality of the pasture.
